

VIBRANT TRANSFORMATION

Located in Wimbledon Village, this three-storey Edwardian property has been transformed into a colourful, fun family home. The owners wanted to showcase their exuberant personalities within a new design scheme. The entire home has been upgraded to become a contemporary space featuring a sophisticated colour palette with elements of fun weaved into the design. Clearly defined family and adult-entertaining spaces have been created as well as a striking kitchen-dining-living space. A sophisticated and cocooning colour palette has been chosen for the lounge and the family living space features pops of colour with a lemon yellow, contemporary, bespoke sofa and matching armchair. These contrast against the jet black piano. Black and white shades have also been used to great effect in this open-plan kitchen-living area. These colours harmonise the monochrome patterned tiles in the hallway perfectly, and add a touch of decadent glamour.

Designed by Emma Green Design and completed in 2023.
